Vaya Health Partners with Local Department of Social Services to Enhance System of Care for Youth

PERSON COUNTY, N.C. – Vaya Health is partnering with Person County Department of Social Services (DSS) and Youth Villages to help build a stronger continuum of care for youth at risk of being removed from their homes and their families through the launch of the Single Point Assessment (SPA).

Across the state, local DSS offices and managed care organizations like Vaya are collaborating with providers to develop and enhance trauma-informed systems of care. Vaya’s specialized DSS service continuum is tailored to the needs of children involved with juvenile justice and child welfare, offering an array of services and practices that focus on both the child and the family. One such practice is a single point of assessment co-located at DSS or Division of Juvenile Justice offices, the goal of which is to refer children to the most appropriate initial services.

Vaya’s approach to care focuses on quickly connecting individuals to services that meet their unique needs,” said Brian Ingraham, CEO of Vaya Health. “By incorporating single point assessments into our DSS continuum of care, we aim to reduce the burden on families and refer children to the most appropriate levels of care.”

Person DSS and Youth Villages will work with each family as they navigate the child welfare system. A mission driven nonprofit, Youth Villages will connect to services children and families who face a range of emotional, mental, and behavioral challenges. From the initial SPA meeting, the assessor completes their assessment within 72 hours and engages with the family and Person DSS about implementation. Youth Villages will connect to services children and families who face a range of emotional, mental, and behavioral challenges.

"As a mental health provider, we know good treatment starts with a good assessment. We are excited to be partnering with Vaya and DSS to help play this important role. Assessments are a vital part of ensuring children and families get linked to the right treatment," said Annie Smith, State Director at Youth Villages.

"It’s convenient for families to have an assessment completed at the local DSS agency and the entire process is very straightforward. The partnership with Youth Villages has been beneficial to Person County DSS and we look forward to working with them," said Kristy Perry, Social Work Program Manager of Person County Department of Social Services.

Person County will also have access to the Child Focused Assertive Community Treatment Team (Child ACTT) through the Children’s Hope Alliance. Child ACTT provides an intensive, team-based, multi-disciplinary approach to serving children in a variety of settings.

Child ACTT services include health and wellness coaching, care coordination, crisis management, enhanced safety planning, individual and family therapy, and psychiatry and medication management. At least 90 percent of members in Child ACTT will see a psychiatrist or psychiatric nurse practitioner within 14 days of admission and at least every 60 days thereafter.

Members must meet the eligibility criteria to receive this comprehensive service. More information on Child ACTT and eligibility criteria can be found at www.childrenshopealliance.org/child-actt.
